Medication History for Panel Management provides timely and accurate dispensed medication data for at-risk patient populations. This enables healthcare providers to better manage high-risk groups to reduce readmissions and CMS penalties, maximize reimbursements and ultimately improve care.

**MEDICATION INFORMATION IS CRITICAL TO MANAGING AT-RISK PATIENT POPULATIONS**

- **Chronically ill patients account for 91% of all prescriptions in the U.S.**
- **50% of medications are not taken as prescribed.**
- **The Department of Health and Human Services wants 90% of Medicare fee-for-service reimbursements to be tied to care quality and value by 2018.**
- **Panel management provides data for nearly 4 billion dispensed medications for 240 million patients.**

“The foundation of successful population health is to be empowered to manage chronic disease. As this continues, it is increasingly important to have access to high-quality and timely information on our patients.”

Michael Mirro, M.D.
Senior Vice President, Chief Academic Research Officer
Parkview Health
EFFECTIVELY MANAGE AT-RISK PATIENT POPULATIONS WITH ACCESS TO THE NATION’S MOST COMPREHENSIVE, TIMELY AND ACCURATE DISPENSED MEDICATION DATA.

Medication History for Panel Management

EASILY MANAGE PATIENT POPULATIONS WITH UNRIVALED ACTIONABLE INTELLIGENCE.

By delivering an unmatched breadth of medication history data to your workflow, Panel Management allows you to produce targeted analytics for specified patient groups of any size. Our trusted data is refreshed nightly, consistently formatted and includes information from nearly all major pharmacies and pharmacy benefit managers (PBMs). Our solution can’t be beat.

USE PANEL MANAGEMENT TO:

- Spot medication non-adherence
- Identify potential medication abuse
- Discover and close gaps in care
- Identify and triage at-risk patient populations to inform care plans
- Measure medication metrics for CMS reimbursements
