

# Real-Time Benefit Check

## ENHANCING PROVIDER AND PATIENT CHOICE FROM WITHIN THE EHR

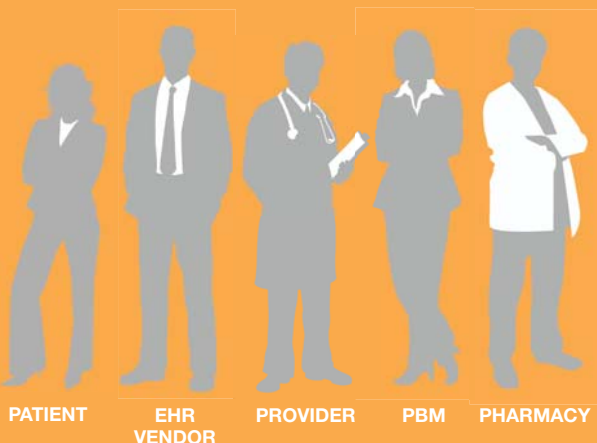

### Complimenting formulary information with patient specific coverage

Surescripts Real-Time Benefit Check (RTBC) enables accurate and complete patient-specific benefit information at the point of prescribing, supporting:

- Better informed provider and patient medication choices
- Awareness of lower cost medication options for patients
- Potential for improved medication adherence

### Advancing today's EHR formulary and benefit information

#### RTBC DELIVERS PATIENT SPECIFIC PLAN INFORMATION AT THE POINT OF CARE

- Comprehensive view of supply options:
  - 30 and 90 day
  - Mail order and retail pharmacy
- Proactive prior authorization alerts
- Indicate patient pay information

### Surescripts RTBC increases care accountability and compliance

Real-Time Benefit Check provides the most complete, patient specific information for more informed medication management decisions. Better informed choices are beneficial for everyone, enhancing health outcomes, cost efficiency, and convenience.

## Improving care efficiency and cost management

Surescripts RTBC makes it possible for providers to find the most appropriate and cost-effective medication treatment options for patients based on their specific formulary and benefit coverage. RTBC provides:

- Consistent, timely and valuable information
- Up-front view of patient cost share, helping reduce medication abandonment
- Awareness of 90-day prescription options via retail or mail service, improving patient convenience and medication compliance
- Ability to identify prior authorization (PA) and alternative medications before e-prescribing

### RTBC provides complete coverage details

FORMULARY STATUS

COVERAGE DETAILS

Age  
Quantity Limits  
PA Indicator  
Step Therapy

MEDICATION SUPPLY OPTIONS

30-Day and 90-Day Prescription Options  
Retail and Mail Order Options

90-day supply can improve adherence by up to 15%<sup>1</sup>

PATIENT PAY INFORMATION

Patient Cost Share

## Provide complete patient benefit information with RTBC

Having access to more complete patient benefit information from within the EHR workflow provides benefits to everyone. RTBC can help:

- Improve formulary compliance and generic utilization
- Positively influence physician prescribing decisions
- Reduce the number of uncovered prescriptions
- Lower patient costs and improve medication adherence
